Re: 5 Year Permit Renewal, ACT/015/007-961, Consolidation Coal Company, Hidden Valley Mine, Folder #2, Emery County, Utah

Dear Mr. Kirschbaum:

On September 19, 1996, you submitted an application for 5-year permit renewal for the Hidden Valley site.

Five maps are included in the permit renewal application: Plate I(b)--Permit Area and Boundary Water Sampling Points, Plate II--Proposed Facilities, Plate III--Final Reclamation, Plate V--Final Configuration, and Plate VI--Road Vertical Alignment. Plates I(b), II, III and V require certification by a registered professional engineer or land surveyor (see R645-301-722.300, R645-301-512.120 & R645-301-521.124, and R645-301-512.130 & R645-301-542.310), while Plate VI requires certification by a registered professional engineer (see R645-301-512.250). Of the 5 maps, however, only Plate III has the necessary certification and it is illegible on the copy submitted to the Division.

The Division finds the permit renewal application acceptable in every respect except the certification of the maps. It is therefore respectfully requested that Plates I (b), II, V and VI be properly certified and that the certification of Plate III be made legible before the Division can approve the application.

Sincerely,

Daron Haddock

Daron Haddock
