RE: Final ACR comments
Belina Complex
ACT/007/001
Carbon County, Utah

Dear Mr. Whiteside:

Please find enclosed a copy of the final version of the joint Division of Oil, Gas and Mining (DOGMM)/Office of Surface Mining (OSM) Apparent Completeness Review (ACR) for the Belina Complex. As we have discussed several times, this final document has been reserved until most items contained therein have been thoroughly understood. The meeting you attended Wednesday, February 2, 1983 appeared to bring out and resolve any remaining issues. Two changes from the draft copy you have had since December 21, 1982 are listed under UMC 784.22, Diversions, and UMC 784.13, Soils.

A brief summarization of the issues which were brought up at the meeting and a plan for their resolution has also been enclosed with this letter.

I hope this information will allow you the clarity needed for a complete presentation by March 18, 1983. As you know, the Division hopes to have at that time enough material to complete the Technical Environmental Analysis (TEA).

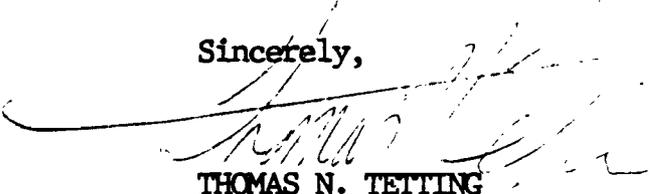

Concerns regarding subsidence over the 1st and 2nd South Mains should be elaborated upon in the annual subsidence report which is to be submitted. Please indicate at what date this may be expected. The Division should be kept aware should any distinct surficial changes occur.

Have you found the additional copies of the Gates Report (5) and the November 1982 resubmittal that were mentioned at the latest meeting?

Mr. Trevor Whiteside
ACT/007/001
