August 13, 1976

MEMO TO FILE:

Re: TRAIL MOUNTAIN COAL COMPANY
Sec. 25, T. 17 S., R. 6 E.
Emery County, Utah

ACT-015-009

This underground coal mine, located on fee land, was inspected on August 4, 1976. The surface facilities are in the deeply insized canyon of Cottonwood Creek on the eastern side of the Wasatch Plateau Coal Field near Orangeville. An old mine was active here about 20 years ago, and much debris is present from the old workings.

Coal is presently being produced, evidenced by a stock pile which is present, also the foundation for a building is being set at the mine site. Surface facilities include a conveyor, grader, access roads, and two (2) earth fill ramps crossing Cottonwood Creek. The ramps are constructed from large boulders and rip-rap with small (24") culverts provided for a stream flow. A pipe drains water from the mine directly into Cottonwood Creek. A sample of this water was collected for analysis.

Vegetation in the area consists of Ponderosa Pine, Cottonwood Halogeten, Yellow Sweetclover, Kochia, and annual grasses.

Forms for filing were left with Mr. Bell so he can file at the earliest possible time on this mine.
