Mr. James W. Smith, Jr.
Coor. Mined Land Development
1588 West North Temple
Salt Lake City, Utah

Dear Mr. Smith:

This letter is to inform you that we have started surveying our control and monitoring stations for our subsidence program. At this point, we will have three monitoring points per panel with horizontal and vertical control. These monitoring points will be resurveyed annually. The control points are set up off the property boundary on locations where no subsidence is anticipated. We are also presently studying options with the Forest Service to have these control points monitored annually with aerial photography.

Sincerely yours,

Andrew King
