Re: N.P.D.E.S. Discharge Permit
No. UT-0022985
June, 1984

Dear Mr. Frenette:

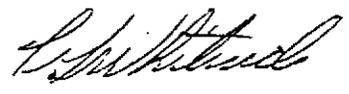

Please find enclosed one (1) copy each of the "Discharge Monitoring Reports" for point sources 004A and 005A, for June, 1984.

Iron concentrations are again unusually high, and assumably result from the excessive ground water.

No discharge occurred from any other permitted source.

Please contact me if you have questions concerning the enclosed.

Sincerely,

T. G. Whiteside
Chief Engineer

TGW/lf
