Memo to Coal File:

RE: Consolidation Coal Company
Emery Deep Mine
ACT/015/015

Consolidation Coal Company's Emery Deep Mine was inspected on the morning of August 2, 1979 by Tom Suchoski and Mike Thompson. The purpose of the visit was to observe the recently constructed sediment ponds.

The two approved ponds appear to be constructed properly. In addition, Consolidation constructed a small basin to facilitate holding runoff from the section of road that crosses the creek. Runoff has not occurred since construction. Seeding will be done this fall.

K. MICHAEL THOMPSON
