Re: Snow-Waste Removal and Disposal Recommendations for Utah Coal Operations.

Dear Mr. Hedberg,

Due to the geographical location of CONSOL's Emery Mine, there have been no problems experienced by excessive snowfall. If a problem of snow-waste removal and disposal should arise, we plan to store it on-site within the permit area. The preferred location (a former coal-stockpile area) ensures that effluent from the eventual melting snowpack will pass through the appropriate runoff and sediment control facilities.

Sincerely,

Stephen C. Drummond
