August 3, 1984

Mr. Ronald O. Hughes
Consolidation Coal Company
P. O. Box 527
Emery, Utah 84522

Dear Mr. Hughes:

RE: Conditional Approval to Modification of Sediment Pond #1 Discharge Structure, Emery Deep Mine, Consolidation Coal Company, ACT/015/015, Folder No. 2, 3 and 4, Emery County, Utah

The Division's technical staff has reviewed the Consolidation Coal Company's plans for modification of the discharge structure from Sediment Pond #1. Based on that review the Division approves the outlet structure modification with the following stipulations:

1. The riprapped channel along and under the culvert shall be graded to ensure that any seepage from the culvert remains within the riprapped channel.

2. The area on the east side of the culvert should be graded to provide a uniform grade from the vertical slope to the riprapped channel.

Compliance with these stipulations will be checked by the Division's inspection and enforcement staff. All work associated with the above stipulations must be completed by August 31, 1984.

Please call me or Tom Suchoski of the technical staff if you have any questions.

Sincerely,

D. Wayne Hedberg

D. Wayne Hedberg
