RE: Sediment Pond
Valley Camp of Utah, Inc.
Belina Complex
ACT/007/001, Folder No. 13
Carbon County, Utah

Dear John:

Here is a Xerox copy of the detail sheet for the sediment pond at Valley Camp's Belina Mine. I had hoped to get a copy of the original from the engineer that did the design, but he will be out of town until next week.

From these sheets, we can see the embankment will be constructed with 2:1 and 3:1 proposed side slopes. Although the cross-section may not be of the highest standard, it is felt it will be adequate to demonstrate the intent to comply with UMC 817.46(m).

If you have any questions, please feel free to give me a call.

Sincerely,

Rick Summers
Reclamation Hydrologist
