Hi Steve,

I am looking into what progress we have made to date and will get back to you next week. We prefer to not go the enforcement route either and have been moving forward as we all discussed two months ago. Thank you.

Kerry

Good morning Kerry,

I wanted to touch bases and see where the outstanding information is that we discussed over two months ago; specifically the outstanding annual hydrologic report and the Emery Deep MRP amendment that revises the water monitoring plan and PHC. The 2015 annual report will be coming your way later this month. As such, we're approaching a year out from when we were to receive the hydrologic report for 2014.

The information is way overdo. I would rather not go the enforcement route. Please contact me and let me know what the status is for receiving this information as soon as possible.

Regards,

Steve

Hi John,

Just checking in to see what the status is of the information that needs to be submitted. As of our last meeting on October 7th, it was my understanding that Rich and Russel were going to continue working on rehabilitating the impacted wells. If that didn't work, the 2nd option was to get a high pressure rig in to try and un-plug the wells. The 3rd option, and correct me if I'm off on this, was to evaluate potentially adding (and potentially rehabilitating) monitoring wells that had been dropped from the monitoring program a few years back. After that, a submittal to the MRP was going to come in and revise the water monitoring plan. Am I tracking on this? There was going to be clarification on the Farmers Pond as well.

I'm also still in need of the outstanding annual water monitoring report. Plus, I spoke with Steve Demczak (Emery Inspector) and he'll attach a copy the updated sediment level survey data that was recently obtained. I'm assuming Russel still has a copy at the mine.

I think that's it. We're way behind on these items John. Call me and let me know what the timeline is.

Thanks,

Steve
