INSPECTION REPORT COMMENTS

Permit No. INA/015/017

Inspection Date 8/11/89

Please number comments to correspond with topics on previous page.

General Comments. The undersigned was accompanied on this complete inspection by Guy Davis, an employee of the company.

Permit. The mid-term permit review was approved by the Division on 1/30/89. No outstanding permit stipulation are pending.

Diversions. The mine site has received several rain storms recently. Nevertheless, the ditches, culverts and runoff conveyance systems appear to be well maintained and fully functional.

Sediment Pond. Sediment pond inspection reports were completed and dated 3/24/89 and 6/30/89. The as built sediment pond drawings and certifications were reviewed and some minor clarifications were discussed with Mr. Davis. The pond contained water from the recent storms. Most of the water did not come from the immediate site. The bulk of the runoff came from the mine area. The operator stated they plan to do some preventative maintenance work in the near future. Pond & records were in compliance.

INSPECTION REPORT COMMENTS

Permit No. INA/015/017

Inspection Date 8/11/89

Please number comments to correspond with topics on previous page.

Other Sediment Control. The upper silt fence near the sediment pond while still functional may require cleaning to avert a compliance failure should a high intensity storm hit the area. There was no evidence that runoff or sediment had bypassed the aforementioned silt fence.

Effluent Limitations. No discharges were reported for the first and second quarter of 1989. The required reports were submitted on 3/24/89 and 6/30/89.

Development Waste & Spoil Disposal. No problems noted. Reports for the first and second quarter were performed by the operator as required.

Subsidence Control. Subsidence reports were completed by the operator for 1988 and no problems were noted.
