Re: Revegetation of Belina Road Slide area in
Eccles Canyon

Dear Mr. Hedberg:

In correspondence from you dated January 31, 1985, addressing the above subject matter, Valley Camp was directed to perform certain revegetation activities by no later than October 20, 1985, at the Eccles Canyon - Belina Road slide area. By this letter, please be informed that on September 13, 1985, the toe of the slope between the slide and the creek, and the access road (embankment) South of the new channel, was revegetated with the approved permanent seed mix. These areas were also covered with straw and treated with a light application of fertilizer.

Also, be advised that willow cuttings were not used in this revegetation effort, and are not at present being considered as supplemental planting.

By this action, I am assuming compliance with our directive and thereby averting the implied enforcement action.

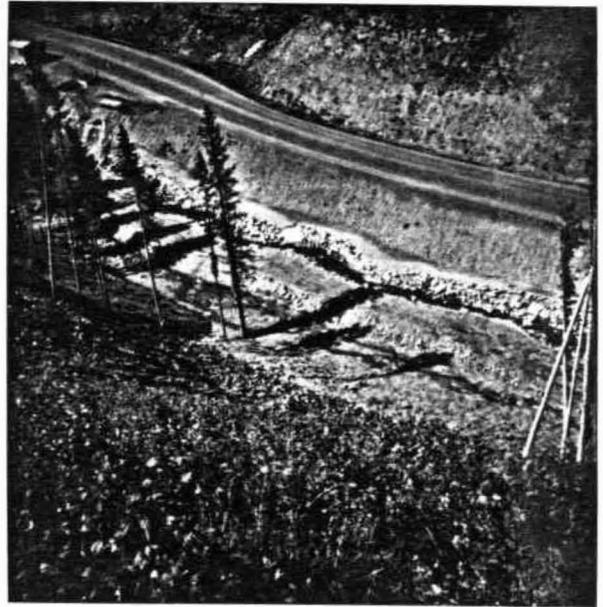

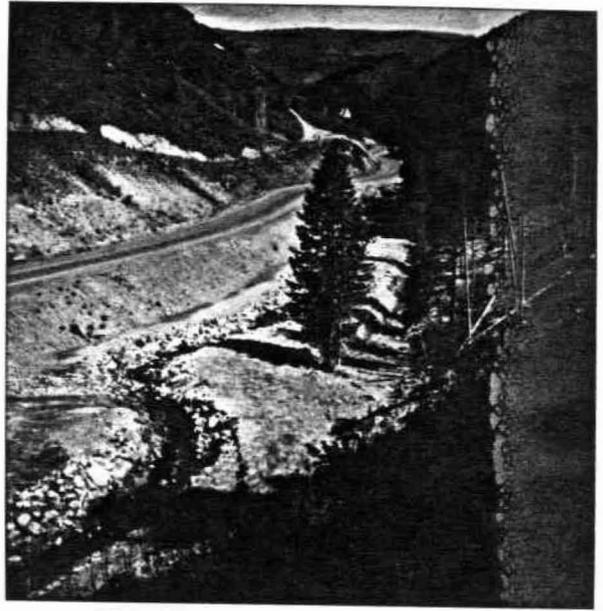

Sincerely,

Trevor G. Whiteside
Chief Engineer
