RE: Notice of Violation No. 85-2-12-1
Material Excavated from No. 2 Pond

Dear Mr. Hedberg:

In correspondence to you dated August 28, 1985, information relating to item nos. 1 & 4 of the subject violation was submitted. As part of that submittal, I enclosed an analysis of the soil samples taken from the material excavated from the No. 2 Sediment Pond. This analysis was to be reviewed by the Division for determination of adequacy as substitute topsoil.

As of this date, I have not been informed of any action on this matter, and the material is still stockpiled in a "temporary" location. Even though this material is encompassed by berms and straw bales, it should be relocated to permanent storage as soon as possible. With winter rapidly approaching, it may even now be too late to relocate this material.

Please advise me as soon as possible as to the results of the Division's review of this material.

Sincerely,

Trevor G. Whiteside
Chief Engineer
