INSPECTION REPORT COMMENTS

Permit No. Act/015/017

Inspection Date 10/8/92

Please number comments to correspond with topics on previous page.

Signs & Markers. Signs and markers were observed at the mine site, the sediment pond, the haul road, and the waste rock site

Diversions. A drop drain near the upper non-coal waste storage site needs additional housekeeping. Cows have destroyed straw bales adjacent to the drop drain. Straw needs to be cleaned so runoff will not transport the straw into the drop drain

Sediment Pond. Pond contained about 2' of water in the area of maximum depth.

Cessation of Operations. The operation is in temporary cessation. All portals have been sealed and not backfilled. Beltlines into the portals have been cut.

Other Sediment Control. The straw bales partially destroyed by livestock mentioned above should be replaced

Roads. The ancillary road going to the Beetline Portals needs some housekeeping. The road is passable by vehicles, however, some rocks have fallen from the cliffs above. Rocks need to be removed for improved vehicle travel

The beltline project on the haul road has been returned to the operator. Requested the operator resubmit his amended proposal within 30 days i.e., 11/8/92.

Copy of report mailed to PEO/ Karl Houskeeper, OSM/ Brian Smith; DOGM/Joe Helfrich

Copy of report given to filed PEO
