TO: Wayne Hedberg, Permit Supervisor

FROM: Thomas J. Suchoski, Reclamation Hydrologist 

RE: Sediment Pond No. 4, Belina Mine, Valley Camp of Utah,
ACT/007/001, Carbon County, Utah

#13

On November 28, 1984, Tom Suchoski, Hydrologist for the Division contacted Trevor Whiteside, Chief Engineer for Valley Camp of Utah as a follow-up to a October 29, 1984, request for an additional copy of the 1978 Vaughn Hansen Report. On November 26, 1984, the Division received a letter from Valley Camp indicating that they did not have any additional copies of the Vaughn Hansen Report to provide to us and that their one and only copy was not suitable for reproduction. They also indicated that the completed Vaughn Hansen Report was submitted to the Division early in 1979 and that the Division had provided a letter and comments on June 1, 1979 indicating that they had received and had conducted a review of the report. The letters indicated are found in the Valley Camp File for 1979.

In the telephone conversation, Trevor indicated that it was his feeling that Valley Camp was not responsible for the Division's loss of the Report and as they had provided it to us and had documentation to that effect, if the Division wanted an additional copy of the report we should be willing to pay for it. Mr. Suchoski indicated that he could not make a decision whether or not the Division would be willing to pay for the purchase of such a report, but did ask Mr. Whiteside to check into the availability of such a report and what cost would be incurred by the Division if that route were taken. Mr. Whiteside readily agreed to follow-up on such a request and hoped that if it were possible another search of our files would produce the missing document.

I feel that it is important to obtain another copy of the report, as we are continually having to refer to it in reviews of the Belina Property.
