Inspection Memo
to Coal File:

RE: Utah Power & Light Co.
Deer Creek Mine
ACT/015/018A

Joe Helfrich and Mike Thompson of the Division conducted an inspection of portions of the Deer Creek Mine with Carl Gurr of Utah Power and Light and Joe Kelso and Larry Guyman of Emery Mining Corporation. The purpose of the inspection was to observe changes in the diversion system-sediment pond plan. The proposed diversion ditch on the left fork of the Deer Creek drainage has been deleted. Runoff is instead collected in buried culvert diversion pipes. This results in slightly more runoff entering onto the disturbed area. However, disturbance to the presently undisturbed hillside is reduced.

As built drawings will be submitted in the near future.
