January 11, 1983

Mr. Roger E. Frenette, Chief
Permits Administration; Compliance Branch
U. S. Environmental Protection Agency
1860 Lincoln Street, Suite 900
Denver, Colorado 80203

Dear Sir:

Please find transmitted herewith, the quarterly report for the Wilberg Coal Mine N.P.D.E.S. Discharge Permit (UT-0022896) for the fourth quarter of 1982. The data reported here were obtained from three samples that were collected in the quarter. The average discharge rate of 282,782.61 gallons per day results from a calculation that divides the number of days in the quarter (92) into the total gallons discharged (26,016,000) even though water was not discharged continuously.

Also find transmitted herewith, quarterly discharge reports for Cottonwood Mine, ~~Deer Creek Mine,~~ and Des-Bee-Dove Mines sediment ponds for the fourth quarter of 1982. As noted on the reports, no water was discharged from any of the ponds during the reporting period.

A discharge event occurred at the Wilberg Mine Sediment Pond from December 9 - 13, 1982. The discharge event was due to runoff from a recent snowfall. A sample was collected and analyzed, the results are reported on the quarterly discharge report. The total quantity of water discharged from this event is estimated at 75,000 gallons.

was pond full? + time run off?

Sincerely,

C E Shingleton

C E. Shingleton
