Dear Mr. Braxton:

RE: 1987 2nd Quarter Engineering Inspection Reports
Deer Creek and Cottonwood/Wilberg Mines
ACT/015/018 and ACT/015/019

Transmitted herewith are the certified engineering reports for the waste rock sites of the above mentioned mines for the 2nd quarter of 1987.

Sincerely,

Ray Christensen

DEER CREEK

ACT/015/018

WASTE ROCK DISPOSAL SITE

ENGINEERING REPORT

2ND QUARTER 1987

INTRODUCTION:

This report is required by UMC 817.71 (i) and our mine plan.

The disposal area is an extension of the existing material storage, parking lot fill structure.

Material from the trommel screen, sediment and underground development waste are dumped at the site. As material accumulation dictates, compacted lifts of two feet maximum depth are made on the active fill surface. Any trash or extraneous materials is hand sorted at the time of compaction and placement.

OPERATION:

Active fill surface is at elevation 7423.07.

CERTIFICATION:

I do hereby certify that the Deer Creek waste rock site is being constructed according to sound engineering practice and regulations governing its construction and the approved M.R.P.

ACT/015/019

WASTE ROCK DISPOSAL SITE

ENGINEERING REPORT

2ND QUARTER 1987

INTRODUCTION:

This report is required by UMC 817.71 (i) and our mine plan.

The disposal area is located on an approved 16 acre right-of-way from the B.L.M. located approximately two miles from the Cottonwood/Wilberg Mine site. This site serves both the Cottonwood/Wilberg and the Des-Bee-Dove Mines.

OPERATION:

During the 2nd quarter, material from both mines was placed in the facility. Trash and extraneous material was removed and spreading and compacting was completed.

CERTIFICATION:

I do hereby certify that the Cottonwood/Wilberg waste rock site is being constructed according to sound engineering practice, the regulations governing its construction and the approved M.R.P.
