RE: Need for Administrative Input - Progress of Kaiser's
Sunnyside MRP Review, ACT/007/007, Folder No. 2, Carbon
County, Utah

The technical staff have completed their review of the most recent submittal received from Kaiser Steel Corp. (December 3, 1984). The technical adequacy of the Sunnyside MRP remains very insufficient in many respects and the staff requests administrative input into the review process prior to an additional technical deficiency letter being sent to Kaiser. We also request that the administration provide us with guidance relative to the Alluvial Valley Floor determination process for this mine.

It is suggested that the above be accomplished in a meeting between the review team and yourselves during the week of January 7th, or sooner, if possible. This meeting will take about 30-45 minutes.

Thank you for your attention to this pressing matter.
