Mr. Trevor Whiteside  
Chief Engineer  
Valley Camp of Utah, Inc.  
Scofield Route  
Helper, Utah 84526

Dear Mr. Whiteside:

Re: Abatement Plans for Cleanout of Sediment Pond #4, NOV N84-7-6-1, Belina Mine Complex, Valley Camp of Utah, ACT/007/001, Folder No. 7 and 3, Carbon County, Utah

The Division Technical Staff is in receipt of your February 15, 1985 letter regarding the Division's letter of January 18, 1985. The Division appreciates Valley Camp's concerns and wishes to insure adequate understanding of the problem.

In regard to your concerns over item number 3 of the January 18, 1985 letter. The Division specified UMC 817.46(r) for two reasons.

1. To ensure that the cleaning of the pond had not changed the configuration of the sedimentation pond as designed.
2. As you indicate in your letter the changes to the decant structure must be certified. If the existing sediment pond meets the approved design criteria for which it was originally constructed, and the modification designs to the decant pipe are certified, the Division's concerns will be addressed. A copy of the engineer's certification is requested upon implementation of the same.

In regard to your request for an extension to March 6, 1985 provide information for a particle size analysis of the soil and a typical influent to be retained in the sediment pond, the Division hereby grants such an extension.
