INSPECTION REPORT COMMENTS

Permit No. ACT/015/018

Inspection Date APRIL 7, 1988

Please number comments to correspond with topics on previous page.

1. The current area of mining was noted: The longwall is in the Ninth West Panel and development is occurring in 10th West and 7th and 8th East. Mining is on 4 days and coal stockpiles are at a maximum.
The permit stipulation status was discussed. The operator maintains that the stipulations were committed to by virtue of signing the "permit approval" document!! This will be addressed in the annual report.

2. Stream buffer zones were noted by proper signage by the fan.

6. The development waste is being temporarily stored on the approved storage pad in various areas. A reply is
