INSPECTION REPORT COMMENTS

Permit No. _____

Inspection Date _____

Please number comments to correspond with topics on previous page.

4) Surface and Groundwater Monitoring:
The In-mine sampling records were examined and no problems were found with the documentation of sampling (i.e. lab sheets, etc.) It was determined from examination of the sampling parameters that sites (3RD SOUTH "B" Cross Cut 21 and 3RD North Cross Cut 41) need additional baseline data collection to complete the requirements spelled out in the Division's Water Monitoring Guidelines.

4) Sediment Ponds and Impoundments
The NPDES permit has been changed to reflect the total amount of Total Dissolved Solids (TDS) discharged from outfall 001 decant operations is limited to one ton (2000 pounds) per day of TDS. The operator is using a bucket and stopwatch to determine compliance.

Brian Smith, OSM
