Mr. Trevor Whiteside
Mine Engineer
Valley Camp of Utah, Inc.
Scofield Route
Helper, Utah 84526

Dear Mr. Whiteside:

Re: Valley Camp Subsidence Monitoring Report, Valley Camp of Utah, Belina Complex, ACT/007/001, Folder No. 4 and 10, Carbon County, Utah

The Division has reviewed the annual subsidence monitoring submittal (September 1985) for the Belina Mine Complex.

To fully assess impacts caused by subsidence and to provide a record of the effects of subsidence the following information is requested:

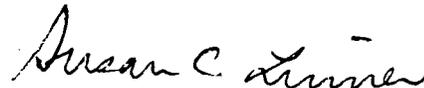

1. Indicate the difference between pillared areas and full seam extraction as indicated on the legend of Plate 3.
2. Show the current mining area(s), the area(s) mined since the last subsidence report and the area(s) and seam(s) that are planned to be mined between now and the next subsidence report and, state the type of mining (room and pillar or longwalls) that will be employed.
3. Report areas where mining has intercepted fracture zones, faults, and groundwater.
4. Submit subsidence data (surface measurements and changes in elevations).

Mr. Trevor Whitesides
ACT/007/001
December 19, 1985

5. Discuss water production in the mine since the last subsidence report and summarize any changes in quantity and quality.

Please submit this information within 30 days of receipt of this letter. Thank you for your cooperation.

Sincerely,

Susan C. Linner
Reclamation Biologist/
Permit Supervisor
