DIV. OF OIL, GAS & MINING

Dear Luci Malin,

In regards to the proposed Pacificorp / Rilda Canyon Project. It is too bad they have too disturb this canyon and its springs (especially in our current drought condition). My main concern is that all this expense & work is unnecessary.

Genwal Coal Co. was already mined up to the coal lease and could have been mining it a lot cheaper for rate payers and everyone, concerned several years ago.

Too bad the public service commission & rate payers aren't more educated on modern day coal mining practices & also how much coal was never recovered at Pacificorps other operations, before they were allowed to bid on LB-11 lease.

I'm sure the Rilda Project will mean another rate increase for Utah Power Customers

I have worked for Pacificorp & Genwal and for this reason would like to remain anonymous
