Mr. C. E. Shingleton, Director
Permitting Compliance and Services
Utah Power & Light Company
P. O. Box 899
Salt Lake City, Utah 84110

Dear Mr. Shingleton:

RE: Approval with One Condition, Amended 4th East Tube Conveyor, Wilberg/Cottonwood Mine, ACT/015/019, #3, #4 and #7, Emery County, Utah

Based on your September 19, 1985 submittal, the concerns raised during our phone conversation on September 18 have been adequately addressed. The material submitted September 19 addresses the berming of the bent structure pad, reclamation time frame for both crane pads, retaining wall and access road, as well as sediment control during reclamation.

The Division hereby approves the amended 4th East Tube Conveyor Plan as submitted September 19, 1985 and requires as a condition to this approval the implementation of the attached design on the silt fence installation for the bent structure pad. This silt fence installation will require maintenance and must be inspected closely to insure it functions properly.

Thank you for your cooperation and prompt submittals.

Sincerely,

John J. Whitehead
