RE: Vegetation Test Plots, Valley Camp of Utah Inc., Belina Complex, ACT/007/001, Folder No. 2, Carbon County, Utah

On October 20, 1987, I met with Mr. Barry Barnum of Valley Camp to inspect the test plots at the Belina site and the Utah #2 site.

The test plots implementation was completed on October 16, 1987, with evidence on site that the seed (both sites) and fertilizer (at Belina site) had been raked into the soil and mulched with a wood-fiber hydromulch after seeding. Treatments at the Belina site were marked with t-posts and the Utah #2 site was fenced.

All field observations indicated that both test plots were constructed according to the plan.
