Attention: Bill Wollen

Dear Bill:

The following estimates for Revegetation Monitoring are rough, but should give you a decent idea of cost per year in 1981 dollars.

	Activity	# persons	# days	# man hours
1.	Data Collection - Reference Area	2	1.5	27
2.	Data Collection - Revegetated Areas	2	3.5	63
3.	Sample drying and weighing	1	3	27
4.	Data analysis	1	2	18
5.	Report - writing, typing and proof-reading	1	1	9
				144

Average charge per man hour: $32.00 (32 x 144) = $4,608.00

6. Mileage 350 miles x $0.35 = $122.50

7. Perdiem = $300.00

Total estimated cost = $ 5,030.50

Call if you have any questions.

Sincerely,

Thurman Madden
