Cc: Steve Christensen <stevechristensen@utah.gov>

I have attached the report and request sheet for sample 201602078 in pdf format. The sample was collected on 5/25/2016 and delivered to the lab on 5/31/16.

Thank you,
Keith

Lab Number: 201602078 Sample Type: 04 Cost Code: 901B
Description: DAME FIELD IRRIGATION LINE
Collector: PB

Site ID:	Source No: 00	Organic Review:	
Sample Date: 05/25/2016	Time: 14:00	Inorganic Review:	06/24/2016
		Radiochemistry Review:	
Dis. Cations: 138 mg/l	8.8 me/l	Microbiology Review:	
Dis. Anions: 669 mg/l	16.1 me/l		
Total Wt: 807 mg/l	%D = 29.3		

TEST RESULTS:

Bicarbnate	340 mg/l	CO3 Solids	167 mg/l
Carb. Diox	4 mg/l	Carbonate	0 mg/l
Chloride	12.6 mg/l	D-Calcium	78.9 mg/l
D-Magnesum	59.5 mg/l	Fluoride	0.3791 mg/l
Hydroxide	0 mg/l	L-Sp. Cond	1355 umhos
Lab-pH *	8.091	Manual pH *	8.216
Sulfate	489.0 mg/l	T-Aluminum	734.04 ug/l
T-Arsenic	<1.0 ug/l	T-Berylium	<1 ug/l
T-Boron	94.8 ug/l	T-Cadmium	<0.5 ug/l
T-Calcium	78.9 mg/l	T-Chromium	<2.0 ug/l
T-Cobalt	<30 ug/l	T-Copper	<5.0 ug/l
T-Iron	1.1 mg/l	T-Lead	0.701 ug/l
T-Magnesum	59.5 mg/l	T-Mangan	30.57 ug/l
T-Molybdum	4.372 ug/l	T-Nickel	<5.0 ug/l
T-Potassum	6.28 mg/l	T-Selenium	2.837 ug/l
T-Sodium	174.0 mg/l	T-Vanadium	<30 ug/l
T-Zinc	<50.0 ug/l	T. Hardns.	441.7 mg/l
TDS @ 180C	1006 mg/l	Tot. Alk.	279 mg/l

QUALIFYING COMMENTS (*) on test results:

Manual pH. Holding time was exceeded before sample delivery.
Manual pH. Holding time was exceeded before analysis was completed.
Lab-pH.... pH should be performed as a field test.

Trace levels up to 0.2 ppb metals may be present in bottles

* 1/2 gallon not in ephl container (says minerals). provided extra if needed for testing.

le 3. Recommended limits for constituents in reclaimed water for irrigation. (Adapted from Rowe and Abdel-Magid, 1995)

Constituent	Long-term use (mg/L)	Short-term use (mg/L)	Remarks
Aluminum (Al)	5.0	20	Can cause nonproductivity in acid soils, but soils at pH 5.5 to 8.0 will precipitate the ion and eliminate toxicity.
Arsenic (As)	0.10	2.0	Toxicity to plants varies widely, ranging from 12 mg/L for Sudan grass to less than 0.05 mg/L for rice.
Beryllium (Be)	0.10	0.5	Toxicity to plants varies widely, ranging from 5 mg/L for kale to 0.5 mg/L for bush beans.
Boron (B)	0.75	2.0	Essential to plant growth, with optimum yields for many obtained at a few-tenths mg/L in nutrient solutions. Toxic to many sensitive plants (e.g., citrus) at 1 mg/L. Most grasses relatively tolerant at 2.0 to 10 mg/L.
Cadmium (Cd)	0.01	0.05	Toxic to beans, beets, and turnips at concentrations as low as 0.1 mg/L in nutrient solution. Conservative limits recommended.
Chromium (Cr)	0.1	1.0	Not generally recognized as essential growth element. Conservative limits recommended due to lack of knowledge on toxicity to plants.
Cobalt (Co)	0.05	5.0	Toxic to tomato plants at 0.1 mg/L in nutrient solution. Tends to be inactivated by neutral and alkaline soils.
Copper (Cu)	0.2	5.0	Toxic to a number of plants at 0.1 to 1.0 mg/L in nutrient solution.
Fluoride (F^-)	1.0	15.0	Inactivated by neutral and alkaline soils.
Iron (Fe)	5.0	20.0	Not toxic to plants in aerated soils, but can contribute to soil acidification and loss of essential phosphorus and molybdenum.
Lead (Pb)	5.0	10.0	Can inhibit plant cell growth at very high concentrations.
Lithium (Li)	2.5	2.5	Tolerated by most crops at up to 5 mg/L; mobile in soil. Toxic to citrus at low doses recommended limit is 0.075 mg/L.
Manganese (Mg) Mn	0.2	10.0	Toxic to a number of crops at a few-tenths to a few mg/L in acid soils.
Molybdenum (Mo)	0.01	0.05	Nontoxic to plants at normal concentrations in soil and water. Can be toxic to livestock if forage is grown in soils with high levels of available molybdenum.
Nickel (Ni)	0.2	2.0	Toxic to a number of plants at 0.5 to 1.0 mg/L; reduced toxicity at neutral or alkaline pH.
Selenium (Se)	0.02	0.02	Toxic to plants at low concentrations and to livestock if forage is grown in soils with low levels of added selenium.
Vanadium (V)	0.1	1.0	Toxic to many plants at relatively low concentrations.
Zinc (Zn)	2.0	10.0	Toxic to many plants at widely varying concentrations; reduced toxicity at increased pH (6 or above) and in fine-textured or organic soils.
