DIVISION OF
OIL, GAS & MINING

Dear Ms. Linner:

One of the stipulations of our Mid-Term Permit Review is that we submit a complete, updated, and reorganized MRP 120 days prior to the expiration of the current permit. We committed to have the submittal completed by October 31, 1988. However, we have had some projects directly related to the permit, come up which have taken our time away from the reorganization of the permit. We have made considerable progress in reorganizing the permit. All of the verbage is in a word processor in a consolidated format. We are now in the process of making a completely new set of base maps. The maps and some of the exhibits for the permit will not be ready by October 31.

We request that we be allowed to retract our self-imposed deadline of October 31, 1988, and instead use the Division's deadline of 120 days prior to the expiration of the current permit.

In order to assure you of the progress we have made and of our ability to meet the deadline, we would be happy to review with you the work we have completed and the work in progress.

Thank you for your consideration.

Sincerely,

Barry Barnum
