RE: Southern Utah Fuel Company
Convulsion Canyon Mine
Enforcement Action
NOV N83-7-3-1 and
Conductance Monitoring
ACT/041/002
Folder No. 7
Sevier County, Utah

Dear Steve:

Enclosed please find a copy of NOV N83-7-3-1 issued to Southern Utah Fuel Company on March 24, 1983 pursuant to exceedances of effluent limitations from the sediment pond discharge. This NOV has not been terminated to date pending Division review of Sufco's demonstration that the pond is adequate for a 10 year, 24 hour precipitation event as per the remedial action. Also I am awaiting further analyses to determine if effluent limitations are being met.

Also enclosed is a memo to coal file from my March 9, 1983 inspection in which a discussion of conductance monitoring as related to TDS sources is presented. I hope these documents help you. Should you have any questions or comments, please call.

Sincerely,

Ken Wyatt
