TO: Memo to Coal File, Inspection and Enforcement

FROM: Sandy Pruitt, Mining Field Specialist SP

RE: Southern Utah Fuel Company (SUFCO), Convulsion Canyon Mine, ACT/041/002, File #7, Sevier County, Utah

An inspection of the above mentioned mine site was conducted by Sandy Pruitt on August 30, 1984. Representatives of the Division of Oil, Gas and Mining (DOGM), Lorin Nielsen, Acting Assessment Officer, and Joe Helfrich, Field Supervisor accompanied this inspector on a brief tour of the mine site. SUFCO personnel were not available for this inspection so the inspectors quickly drove through the mine site to familiarize Mr. Nielsen with the property.

SUFCO have not yet started construction of the retaining wall behind the office building. There was no obvious movement on the slope. The water level in the sediment pond appeared down about 3 feet. A culvert was being installed across the road below the guard shack to divert undisturbed area drainage past the mine sediment pond. SUFCO had placed riprap at the discharge end of the culvert which is on a steep slope and secured the riprap with chainlink staked down with roof bolts.

No violations were warranted as a result of this inspection.
