INSPECTION REPORT

INSPECTION DATE & TIME: Feb. 23, 1988
1:30 p.m. to 4:30 p.m.

Permittee and/or Operators Name: Valley Camp of Utah
 Business Address: Scofield Route Helper, Utah 84526
 Mine Name: Belina Complex Permit Number: ACT/007/001
 Type of Mining Activity: Underground Surface Other
 County: Carbon State Utah
 Company Official (s): Steve Tanner
 State Official(s): Daron Haddock, Holland Shepherd
 Partial: Complete: Date of Last Inspection: Jan. 22, 1988
 Weather Conditions: Clear and mild
 50.
 Acreage: Permitted 2837 Disturbed 79 Regraded Seeded Bonded 79
 Enforcement Action: None

COMPLIANCE WITH PERMITS AND PERFORMANCE STANDARDS

PERMIT NUMBER: ACT/007/001

DATE OF INSPECTION Feb. 23, 1988

(Comments are Numbered to Correspond with Topics Listed Above)

GENERAL COMMENTS:

The subject of certifications was discussed with Mr. Tanner. He indicated that new design plates of the Valley Camp facility will be forthcoming, pending work done by Olympus Aerial Surveyors. They are planning to have something from Olympus within the next couple of weeks.

4b. DIVERSIONS:

The outlet of the 36-inch culvert and drainage channel along the Belina haul road was inspected. The erosion control structures (rocks and mesh wire) are in place and functioning properly.

4c. SEDIMENT PONDS:

The settling pond at the Belina site appeared to be in good condition with adequate straw mulch still in place along the top of the embankment.

4f. EFFLUENT LIMITATIONS:

Water was being discharged from pond 005 (mine water pond) and a sample was taken during the inspection. The water appeared clean with no visible problems.

14. SUBSIDENCE CONTROL:

Mr. Tanner indicated that aerial surveys have been performed by Olympus Aerial Surveys and that information should be available in a couple of weeks.

16b. DRAINAGE CONTROLS:

A lot of water was running due to snow and ice melt, all of which appeared to be flowing according to plan. There was a culvert south of the loadout and a drop drain west of the substation which were blocked with ice. Mr. Tanner indicated that these culverts are not necessary for proper drainage and are there primarily for convenience. It was noted that all the water, bypassing these culverts, drained to the sediment pond. During the inspection a backhoe crew was dispatched to the site to free the culverts.

16d. ROAD MAINTENANCE:

Spring thawing is allowing some rock and debris to fall down the upper embankment of the Belina haul road to the road and drainage ditch. A crew was working on removing snow and debris from the road and keeping the ditch clear.

A small amount of coal had fallen from a truck onto the highway in front of the loadout facility. This was cleaned up during the inspection.
