TO: File DOE/023/012

FROM: Richard V. Smith, Geologist RVS
Everett Hooper, Reclamation Soils Specialist

RE: Field Inspection September 6, 1985

The site occurs near the crest of the Deep Creek Mountains along Queen of Sheeba Canyon. Although the mine site was not directly observed, road usage in the area indicates recent mining activity has not taken place. The claims associated with this DOE site should be reviewed to ascertain whether they have lapsed or the ownership has transferred. If the claims have lapsed or changed ownership, the file should be archived.
