Notes for letter
Sent out 4/2/79

5/23/79

Mike,

In answer to all these scraps of paper and short questions on this and that:

1. Mikael - now I know how to spell your name now.

2. Exp work can only be required to reclaimed if it is associated with drilling - mud pits, drill pads etc. Excess rock piles from exp work do not appear to be covered at this time.

3. As a DOE or EXP, the same procedure should be taken to avoid problems similar to Nystrom.
   A. Inspect before work is done.
   B. " during work.
   C. " after ".

4. Send your letter asking for more info on the surface work.

Ron

P.S. 5. MAW's letter comment is not necessarily true.
