January 18, 1989

Mr. Barry Barnum  
Valley Camp Coal Company  
Scofield Route  
Helper, Utah 84526

Dear Mr. Barnum:

Re: Substitute Topsoil Analysis, Pond 001A, Valley Camp Coal Company, Belina Complex, ACT/007/001, Folder #2, Carbon County, Utah

The Division has received the second set of analyses of material removed from sediment pond 001A, on January 6, 1989. This was reviewed by James Leatherwood, Reclamation Soils Specialist, to determine suitability of the material for substitute topsoil. The material excavated from sediment pond 001A has been determined suitable for use as a substitute topsoil material for field site trials at the Fan Portal 1 area.

Respective plates, maps, and permit page updates, describing the location, use, and analysis of the soil material must be incorporated into the permit renewal package due April 24, 1989.

If you have any questions please call me or James Leatherwood.

Sincerely,

Susan C. Linner  
Reclamation Biologist/  
Permit Supervisor
