13 December 1991

S/015/041

Holland:

Enclosed are documents concerning the San Rafael gypsum-rock operation

I have completed an agreement with Mr. Phillip M. Palmer to quarry the gypsum rock. He has complied with the bonding, insurance and other requirements

Shortly after the 1st of the year, he will direct reclamation adjacent to the Moore Road and elsewhere where the gypsum rock quarrying is completed. He will also reclaim small areas requested by the BLM in the adjacent claim BJ-5. The quarry is in BJ-2.

I will reseed immediately after the contouring is completed so as to take advantage of the winter moisture

Palmer will be removing gypsum rock only from the presently disturbed area for some time into 1992, this will give us time to systematize the mine plan.

I need 3 copies of Form MR-AR Annual Report of Mining Operations so that I can file three San Rafael and Shivwits report in your office.

Sincerely,

John
