Minerals Program

SUBJECT Current Status Pagano Clay Project

DATE 10/1/92

I spoke to Harold Marston today owner/operator of the Pagano Clay Project. He indicated to me that he has already started to reclaim the site and plans to maintain only the roads which access it, into the future. He also indicated that he didn't plan to submit a plan for the site, feeling that reclaiming the site would resolve the issue of non-compliance. A resolution was not reached during our conversation. However, we decided to discuss the subject further next week during an inspection of the site.
