RE: Acreages at Barrick Mercur, M/045/017 and Moab Salt, M/019/005

The Barrick Mercur site will increase from 1,239 acres to 1,674 acres. The operator has proposed a 435 increase in permitted acreage. Actual disturbed acreage, digitized from the revision map, will be approximately 150 acres.

Moab Salt has proposed 1,002 acres of disturbance. 520 acres compose the evaporation ponds. 95 acres compose the salt storage and brine lake area. The bulk of the disturbance is on fee land.
