Dear Mr. Summers:

Attached are summaries of the water quality data collected for Valley Camp of Utah, Inc. during April, 1992. All seven surface water monitoring sites were accessible and a water quality sample was collected at each site. Only one ground water monitoring site (S25-13) was accessible during April and a water quality sample was collected. Snow drifts across the access roads prohibited access to the other six groundwater monitoring sites.

The next water quality monitoring will be completed between May 20th and May 30th.

Sincerely,

Jerry V. Hansen
