355 West North Temple
Salt Lake City, Utah 84180-1203

Dear Mr. Summers:

Attached are summaries of the water quality data collected for Valley Camp of Utah, Inc. The data is complete through May 30, 1992.

An attempt was made to collect a water quality sample from each of the fourteen monitoring sites during the month of May. Because of snow drifts and road closures by the U.S. Forest Service monitoring sites S7-11, S31-13, S36-19 and S36-23 were not accessible and a water quality sample was not collected.

The June monitoring was completed on the 16th. All fourteen monitoring sites were visited and a water quality sample was collected at each site. The field data has been tabulated on the summary sheets. The laboratory data will be tabulated and forwarded to you as soon as it is received from the laboratory.

The next water quality monitoring is scheduled to be completed between July 20th to July 31st.

Sincerely,

Jerry V. Hansen
