INSPECTION REPORT
(Continuation sheet)

Page 2 of 2

PERMIT NUMBER: ACT/007/001 DATE OF INSPECTION: December 23, 1992

(Comments are Numbered to Correspond with Topics Listed Above)

1. Permit -

The mine is not producing coal and appears it will not for the near future. Valley Camp has been shipping small amounts of coal from its stock piles, therefore, is still considered an active operation.

4a. Diversions -

Several diversion ditches throughout the property should be regraded due to snowfall. If there is a January snowfall melt there could be a problem with the controlling of water.

19. AVS Check -

An AVS check has been taken at the mine site with no new changes in ownership and control.

Note: This inspection report does not constitute an affidavit of compliance with the regulatory program of the Division of Oil, Gas and Mining.
