VALLEY CAMP OF UTAH, INC.Scofield Route
Helper, Utah 84526

September 13, 1993

Mr. Daron R. Haddock
Permit Supervisor
355 West North Temple
3 Triad Center - Suite 350
Salt Lake City, Utah 84001
Dear Mr. Haddock:

RE: State Violation No. N 93-39-4-1, Valley Camp of Utah, Inc., Bellina Complex, ACT/007/001, Carbon County, Utah

Remedial action required for abatement included submittal of the plans to reduce the sediment volume in Sediment Pond 004A by September 20, 1993. To expedite the cleaning process, please accept this FAX exhibiting the area of placement of the excavated material within the Upper Material Yard (Drawing R645-301-231.300, Sheet 4 of 4, Revision 1, Dated 3/93.

A temporary drying basin will be constructed should the excavated sediment become noticeably unstable. Material which is excavated which will stand unsupported will be placed adjacent to the elevated contours of the Upper Material Yard as depicted on said drawing.

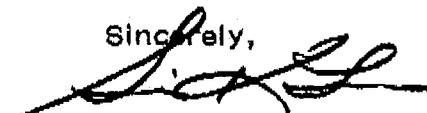

As per our phone conversation I explained we were going to excavate to increase the sediment volume to less than sixty percent. When the volume has been satisfied, collectively the Permittee and UDOGM will obtain a composite soil sample to be analyzed for acid and toxic forming materials.

Valley Camp respectfully requests UDOGM to review this plan at their earliest convenience.

This FAX will be followed up by a hard copy following UDOGM approval.

Thank you for your time and effort concerning this matter.

Sincerely,

Steve Tanner
