RE: Valley Camp of Utah, Inc. Water Monitoring Program

Dear Sharon:

Attached are updated summaries of water quality data collected for Valley Camp of Utah, Inc. for September 1993.

Two separate trips were made during the month of September to obtain water quality data associated with the Belina mining operation. The first trip, conducted on September 16<sup>th</sup> was cut short due to afternoon thunder showers. The second trip completed on September 20<sup>th</sup> collected data from stations missed on the 16<sup>th</sup> with the exception of VC-5. Problems encountered on the 20<sup>th</sup> related to access of the other stations delayed the monitoring of Station VC-5 until after dark whereafter the data could not be collected.

Water Monitoring stations for which data was collected include VC-1, VC-2, VC-4, VC-10, VC-11, VC-12, S7-11, S24-12, S25-13, S31-13, S36-17, S36-19, S36-23.

Please call if you have any questions.

Sincerely,

David E. Hansen, Ph.D., P.E.  
Principal
