NOTICE OF INTENT
TO OPERATE

LOW DOWN I-CLAIM

SOUTHWEST STONE LOCATED AT 377 S. 100 E KANAB UT. OPERATED BY MIKE DETTAMANTI & DON WOOD PLAN TO OPEN & OPERATE THE LOW DOWN-I CLAIM/QUARRY T. 38 S. R. 1 W. SECS 27 & 28. TO FIND CENTER MARKER TRAVEL APROX 1/2 MILE SOUTH ON ROUND VALLEY DRAW RD. WALK EAST APROX 200 YDS.

THE PROPOSED QUARRY AREA IS NEAR CENTER MARKER LOCATED ON VEINS OF ALABASTER BEDDED & VERTICAL ACCESS WILL REQURE SMALL TWO TRACK ROAD 250 YDS LONG RUNNING EAST FROM ROUND VALLEY ROAD. THE ROAD WILL BE INCLUDED IN THE 5 AC. MAXIMUM DISTURBACE AREA. WE WOULD LIKE TO BEGIN WORK BY SEPT 1ST USING A SMALL RUBBER TIRED BACKHOE TO CREATE THE ROAD & BEGIN EXCAVATION.

THE LOW DOWN-I WILL [redacted] INITIALLY BE A DISTURBACE OF LESS THAN 1 AC. INCLUDING THE ROAD SURFACE AREA. THE FIRST EXCAVATION WILL BE THE LEVELING OF A SMALL HILLTOP, AT WITCH TIME A DETERMINATION WILL BE MADE AS TO THE DIRECTION OF THE VEINS. WE WILL KEEP THE DISTURBACE AS SMALL AS POSSIBLE IN ORDER TO MINIMIZE THE FUTURE RECLAMATION. THE FINAL QUARRY MAY LOOK LIKE A 1/2 TO 3/4 ACRE CATTLE POND. TOPSOIL & DIRT WILL BE PUSHED OUT OF THE WAY ON FOUR SIDES.

RECLAMATION

SOUTHWEST STONE & ITS OWNERS WILL RESTORE THIS CLAIM TO ITS FORMER CONTOURS & RESEED NATIVE PLANTS. THIS CLAIM SHOULD BE REALITIVELY SIMPLE TO RECLAIM; BECAUSE THERE IS MUCH AVAILIBLE TOPSOIL ~~AT~~ THE QUARY SITE. AS IS TYPICAL OF MOST GYPSITES THE AREA IS ALREADY BADLY ERRODED, BY PAYING ATTENTION TO WATER DRAINAGE & SEEDING SOIL HOLDING PLANTS WE SHOULD BE ABLE TO RESTORE THIS SMALL DISTURBANCE TO ABOVE ITS FORMER RANGE VALUES & SLOW DOWN NATURAL GULLYING.
