Line - Cricket Mountain

Contacted State lands? Yes

Revegetation - Details of Plan & Schedual?
- " " Protection?
Varience for Rule M-10(12) should not be granted.

Confidentiality needs to be covered.

TJS 1/14/80

MR-2 P. 3 - Planting of PJ should be discouraged. Grass-forb-shrub preferred. Define mixture.

MR-2 P-3 - what specific grazing protection will be used?

MR-8 - Do not give variance. If area in question is bare rock a variance is not required. I would assume some bare rock surfaces would be left. This is OK as pre-mine has outcrops. However, operator should indicate where & how much bare rock will be left upon termination.

MR II - E. define veg. mix. & procedures for soil stockpile protection.

— over —

Check with Ron if processing plant located 6 mi. from pit is covered by Act.

How much of road will be reclaimed, & define rec. specifics?
