Senr. Rec. Spec.

SUBJECT: Arthur Cone. Reclamation, Bingham Pit Mine, ~~M/035/002~~

DATE: 1/17/92

I spoke to Don Deines today of Kennecott concerning the Arthur Concentrator reclamation project/plan. He informed me that more information concerning the project would be forth coming. This information will include topsoiling, borrow areas and revegetation specifications not covered in Runoff Control Plan for the Arthur Cone.

He suggested holding off on commenting on Arthur until we received the rest of the info.

I informed him that we would evaluate any info submitted to us on Arthur, but would approach it less formally than a new area disturbance
