Re: Approval of Plan to Abate NOV N93-39-4-1, Valley Camp Of Utah, Inc., Belina Complex, ACT/007/001, Carbon County, Utah

Dear Mr. Tanner:

The Division has reviewed your plans submitted September 13, 1993, for abatement of NOV N93-39-4-1. Your plans are hereby approved and you should proceed with the pond cleanout as quickly as possible in order to complete the abatement requirements and also to avoid weather complications.

At this time Valley Camp's plans seem to be a temporary fix to a longer term problem. Your MRP should be revised to discuss the interim and final disposition of the cleanout material as well as cleanout procedures to be used in the future. Maps and text should reflect the storage of pond cleanout material. You should also be aware of the commitments you have made to sample the cleanout material and ensure that it remains in a stable condition. Also, be aware of requirements to conduct certified inspections and provide certified reports to the Division in accordance with R645-301-514.300.

We encourage you to proceed with a speedy abatement of this NOV. Please call me or Steve Demczak, Price Field Office, if you have any questions.

Sincerely

Daron R. Haddock  
Permit Supervisor
