George Lucas - Copperton city council MEMBER

CALLED voicing great concern over Kennecott's Barney's Canyon project. Said that many of the town's people are very concerned. he suggested & I agreed to meet with the city council to discuss the proposed plan, and answer any concerns they might have. I also suggested that personnel from Div of Fw. Health be present. Mr. Lucas also wanted me to call - Mr. Ross Pino, chairman, Copperton city council to discuss further. I called but he wasn't home - left message 569-8136.

Mr Lucas also voiced concern over the mine conveyor transfer houses between the mine tunnel and the slurry pipeline creating extreme noise pollution.

Copperton major concern is ~~that~~ in relation to their water supply wells which are located in the same watershed as Barney's Canyon Project.

David Wham

I called Ross Peno, 569-8136, Chairman of Copperton Town Council, on 4-27-88. ~~The~~ The council's concerns revolve primarily around ground water issues. I told Ross that ~~the~~ we would be happy to review the reclamation plans with the council if desired.
