MEMORANDUM

**DATE:** June 28, 1994  
**TO:** Jim Smith - DOGM  
**FROM:** David E. Hansen  
**PROJECT:** Water Quality Monitoring Program  
**PROJECT NO.:** 125.01.100

Jim:

We have received data from ChemTech for the White Oak monitoring program and submit it herein for your reference. Data is enclosed for both April and May 1994. Note from the data submitted that all spring sources were inaccessible during the April sampling period due to lingering snow conditions and road closures on forested lands. May's data showed slightly improved conditions wherein two spring samples were accessible. Although not yet received from the lab, June's data taken on the 16<sup>th</sup> shows much better coverage.

Enclosed with this submittal are:

- An updated water quality summary tabulation sheets for each station.
- Water quality data sheets submitted by ChemTech.
- Anion-Cation balance sheets.
- Flow calculation sheets for stations monitored with a current meter.

Should you have any questions, please call.
