Dear Lynn Kunzler,

We are writing you this letter to inform you that we have chosen option 2, which is, to file a complete and adequate Notice of Intention, to commence a large mining operation. We are currently reclamating the North West corner of our Quarry, to bring the operation to 5 acres, until our Large mining Permit has been reviewed and accepted. We have T-Posts put up in the field, clearly marking our 5 acres of disturbance. We have left a message with Richard Stevens at Maple Leaf Seed Company, and are hoping that he will return our call within the next few days. We are planning on sending our soil test to the lab on Monday. We are currently working on all of our site plans of our operation. We appreciate the time that you spent with us on Monday, reviewing our application and answering the questions and concerns that we had.

Thank You,

Bryan N Haas
